Agreement of Responsibility

Courses offered by the Wilderness Medicine Training Center, Inc. are rigorous and require your full attendance and participation. You may find them mentally, physically, and emotionally demanding. Class time may exceed ten hours per day plus homework. You should be comfortable reading technical information, be able to write clearly, be able to communicate easily with other people, and you should be physically capable of lifting and carrying a minimum of 50 pounds without injury and moving safely in the outdoors in rough challenging terrain and environments without supervision. You are expected to bring the functional outdoor clothing that will protect you from the environment while participating in simulations. During simulations, skills practice, and some demonstrations you will be acting as a patient and as a rescuer; this requires you to touch and be touched by others during a patient exam and subsequent treatment. To protect your personal space you **MUST** wear your bathing suit (jog bra) and/or shorts under your simulation clothing for all PAS Labs; they will **NOT** be cut. Simulations may take place in water, on rocks, on uneven terrain, on steep slopes, on snow and in rain, snow, wind, or bright sun. The course does **NOT** require you to put yourself at risk of injury or illness. If you feel at risk at any time and for any reason during the course, **STOP** your participation in the activity and bring your concerns to the course instructors. Make a plan to address your concerns and resume your participation once you feel safe. Therefore, during your participation in any Wilderness Medicine Training Center, Inc. course, you are responsible for your emotional and physical safety at all times.

The Wilderness Medicine Training Center, Inc. agrees to present skills and techniques according to the practice guidelines established by the Wilderness Medical Society¹, the National Association of EMS Physicians^{2,4,5}, and the spine management guidelines established by Peter Goth, MD³. The Wilderness Medicine Training Center, Inc. is not liable if you do not adhere to those standards in a field situation. Nor does the Wilderness Medicine Training Center, Inc. authorize you to use the skills presented. Your authorization will need to come from a licensed medical control (usually a physician advisor).

If you have successfully completed a certification course (WEMT, WFR, WAFSA, or Review) taught by the Wilderness Medicine Training Center, Inc., you will receive a certification card from the Wilderness Medicine Training Center, Inc.. This card acknowledges that you have successfully demonstrated the skills presented during your course according to the above practice guidelines at the time of your course. It does not certify that you will be able to continue to perform at that level. It is your responsibility to stay current with both your understanding and practice. Most medical control personnel require certification as a baseline for authorization.

If you have participated in a workshop (Wilderness First Aid or a special contract), you will receive a workshop card from the Wilderness Medicine Training Center, Inc. A workshop card states that you were present during the entire workshop. Although the material presented during the workshop will be based on the practice guidelines outlined above, you will not be tested and the card does not certify your ability to perform to those standards. A workshop completion card meets the Labor & Industries, Boy Scouts of America (including Philmont Scout Ranch), American Camping Association, and other state and federal 16-24 hour first aid requirements.

WFA Lab Descriptions

- **Basic Life Support Lab (BLS):** This lab includes basic adult CPR instruction and assesses all elements of the Scene size-up and Initial Patient Exam. CPR certification is not part of this course.
 - **Simulations:** These labs are role plays incorporating patient assessment and documentation. Make-up will be used to increase the scene's reality.
 - **Wound Cleaning Lab:** Pigs feet are used for training realistic wound cleaning.
 - **Extremities Splinting Lab:** SAM splints & sleeping pads are used to teach students how to improvise effective extremity splints with available gear.
 - **Injection Lab** offers hands-on instruction in injectable epinephrine required for the treatment of systemic allergic reactions.
 - **Spine Ruling Out Lab:** This lab teaches students the process for ruling out suspected spine injuries in a wilderness setting.

General Course Information

Courses taught by the Wilderness Medicine Training Center are rigorous and require your full attendance and participation. You may find them mentally, physically, and emotionally demanding. You should be comfortable reading technical information, be able to write clearly, be able to communicate easily with other people, and you should be physically capable of lifting and carrying a minimum of 50 pounds without injury. During simulations, PAS drills, and some demonstrations you will be acting as a patient and as a rescuer; this requires you to touch and be touched by others during a patient exam and subsequent treatment. To protect your personal space you **MUST** wear your bathing suit (jog bra) and/or shorts under your simulation clothing for all PAS Labs; they will **NOT** be cut. During your participation in any Wilderness Medicine Training Center course, you are responsible for your emotional and physical safety at all times.

The Wilderness Medicine Training Center agrees to present skills and techniques according to the practice guidelines established by the Wilderness Medical Society¹, the National Association of EMS Physicians² and the spine management guidelines established by Peter Goth, MD³ The Wilderness Medicine Training Center is not liable if you do not adhere to those standards in a field situation. Nor does the Wilderness Medicine Training Center authorize you to use the skills presented. Your authorization will need to come from a licensed medical control (usually a physician advisor).

After your participation in a Wilderness First Aid workshop you will receive a completion card from the Wilderness Medicine Training Center. This card acknowledges that you have attended and participated in the workshop; it does not certify that you can perform the skills presented. You must be present and engaged for the entire workshop in order to receive a completion card. You will be asked to sign an "Agreement of Responsibility" that acknowledges your understanding of the above information on the first day of your course. You may use this course to recertify your current Wilderness Advanced First Aid, Wilderness First Responder, or Wilderness EMT certification if you successfully complete the WMTC Renewal Packet within two months of the end of your 3-day WFA. The Renewal Packet is available from the "News" page on our website as a pdf download. From our home page click on the "News" tab and then again on the download link. Click a final time on "WMTC Renewal Packet". Please e-mail our office with questions: office@wildmedcenter.com

You will be spending quite a bit of time outside and will likely get very dirty during many of the skills sessions and simulations. Bring clothing appropriate to the weather. It should be tough and old enough to withstand a beating. You will also need to bring a notebook, pen, pencil, backpack, water bottle and two sets of old clothing that may be cut (two pair of long sleeved shirts, two pair of long pants, and two t-shirts). "Cuttable" clothing is required for simulations and practice. Consider bringing colored pencils or pens for note taking. For more details on WMTC courses, please download our Student Booklet; the booklet is available as a pdf file from the "News" page on our Website. The course price includes instruction and the waterproof/tearproof Wilderness Medicine Handbook.
